

Beginner's Guide

To help newcomers experience the fun and rewards of earning while playing in the GameFi world, this article will guide you step by step in making the necessary preparations.

1. Create a Cryptocurrency Wallet

Before participating in a GameFi game, you need to set up a cryptocurrency wallet to make in-game purchases, store NFT assets, and manage rewards earned in the game.

For beginners, we recommend using "OKX Wallet" or "MetaMask Wallet", both of which offer a clean and intuitive interface, making them ideal entry points into the GameFi world.

Simply install "OKX" or "MetaMask" on your mobile device or as a browser extension, create your wallet, and you'll be ready to start your CJC Race journey and connect it to the game later.

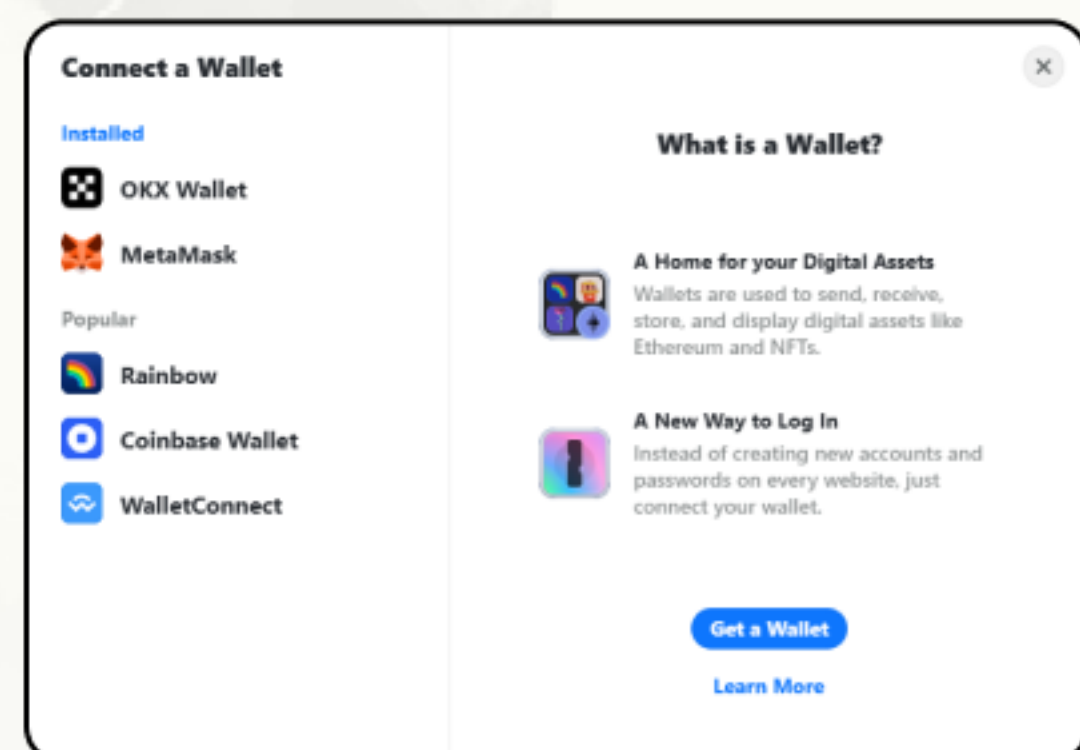

2. Top Up Your Wallet

After creating your wallet, you can proceed to add funds. Transactions in CJC Race use "ARB_USDT" and "ARB_ETH". Please ensure that you top up your wallet with these currencies in advance.

3. Connect Your Wallet

Visit the Marketplace on the official CJC website and connect your wallet to the game. This will allow you to perform various transactions on the site, such as purchasing gift packs and trading NFTs, as well as store CJC Coins earned in-game.

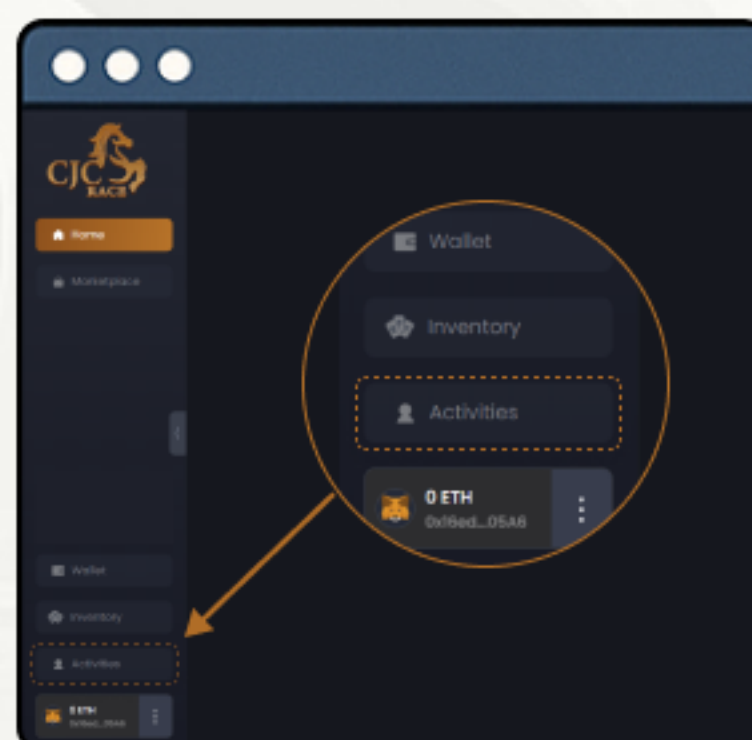

4. Register a Game Account

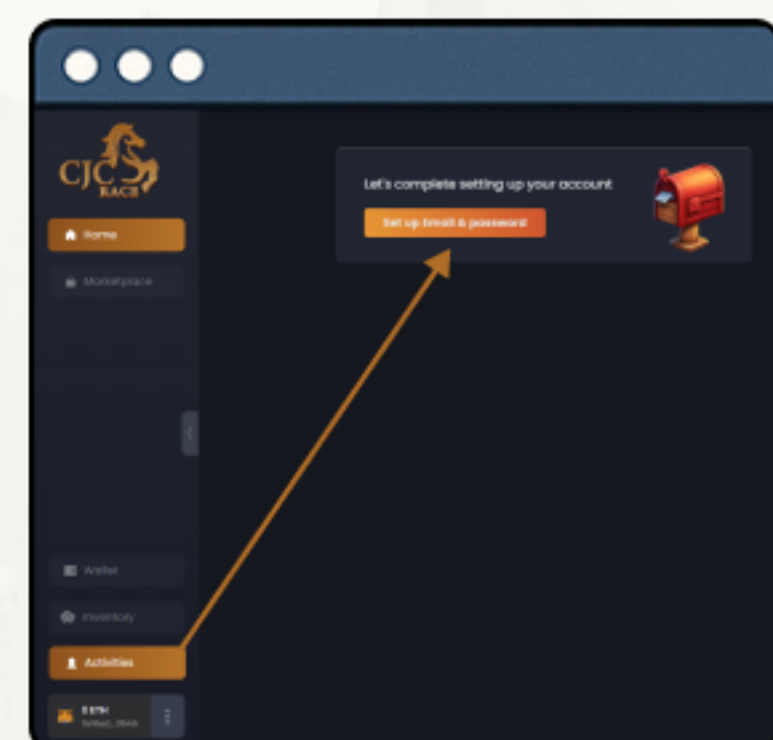

After connecting your wallet, go to the "Activities" section in the Marketplace and register your CJC Race game account with your email address and password.

Step 1
Connect your wallet

Step 2
Click the "Activities" button

Step 3
Bind your email and password

5. Purchase a Gift package and Join TycoonClub for Free

To participate in the CJC Race game, you need at least one jockey and one horse. You can acquire them by purchasing gift boxes in the Marketplace.

By purchasing a gift box, you will receive a free TycoonClub# membership, allowing you to earn sustainable passive income.

Alternatively, you can start the game by purchasing one jockey and one horse directly in the Marketplace using cryptocurrency (ARB_USDT or ARB_ETH).

#The TycoonClub offers a shared reward system, allowing you to earn referral rewards by inviting friends to join a dedicated alliance. You will earn additional rewards whenever your alliance members make purchases.

6. Download the Game and Enjoy

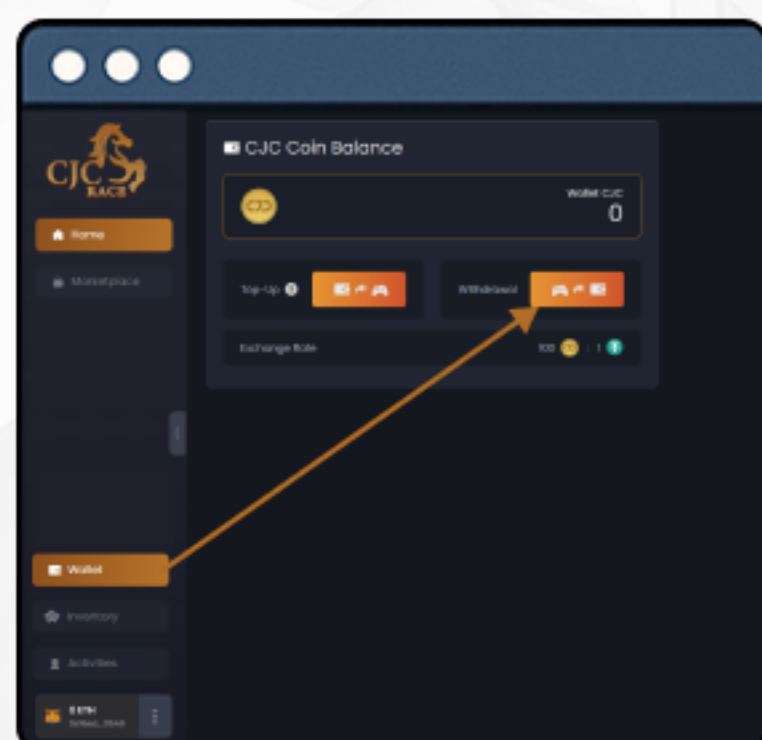

After making purchase, you can download the CJC Race game app from the official CJC website according to the device and start your Play-to-Earn journey!

7. Purchase Game Items, Trade, and Exchange the Earned Game Currency

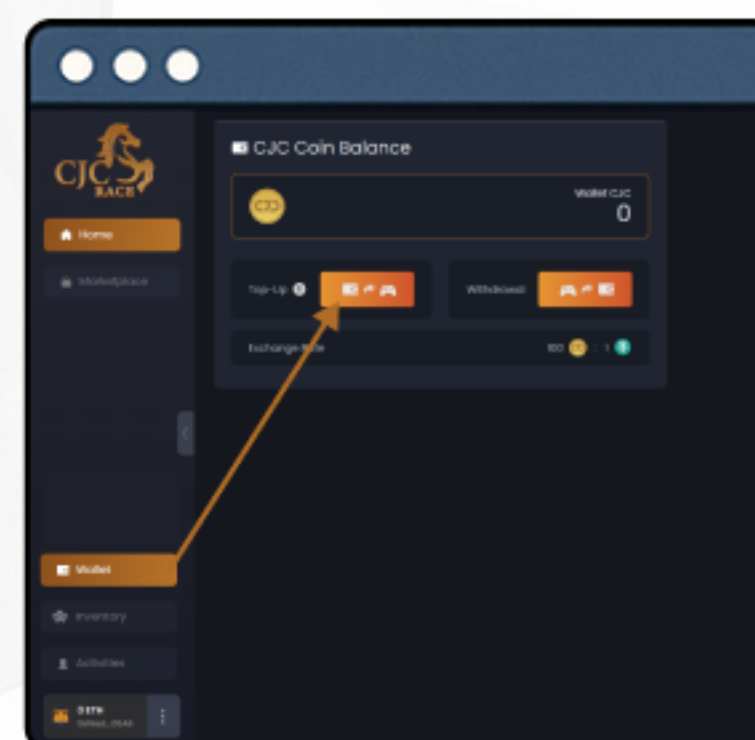

You can use CJC Coins or Diamonds to purchase game items in the in-app shop at any time.

Additionally, you can use cryptocurrency (ARB_USDT + ARB_ETH) in the Marketplace to buy more NFTs, such as horses, jockeys, accessories, etc.

Finally, you can exchange CJC Coins earned in the game for "ARB_USDT" in the Marketplace.
